Advantages and disadvantages of information technology management

Advantages and disadvantages of Executive Information System:

Advantages of Executive Information System;

Executives use that information, along with their experience, knowledge, education, and understanding of the corporation and the business environment as a whole, to make their decisions.

- Executives are more inclined to want summarized data rather than detailed data (even though the details must be available). ESS rely on graphic presentation of information because it's a much quicker way for busy executives to grasp summarized information
- It provides timely delivery of company summary information.
- It provides better understanding of information
- It filters data for management.
- It provides system for improvement in information tracking
- It offers efficiency to decision makers.

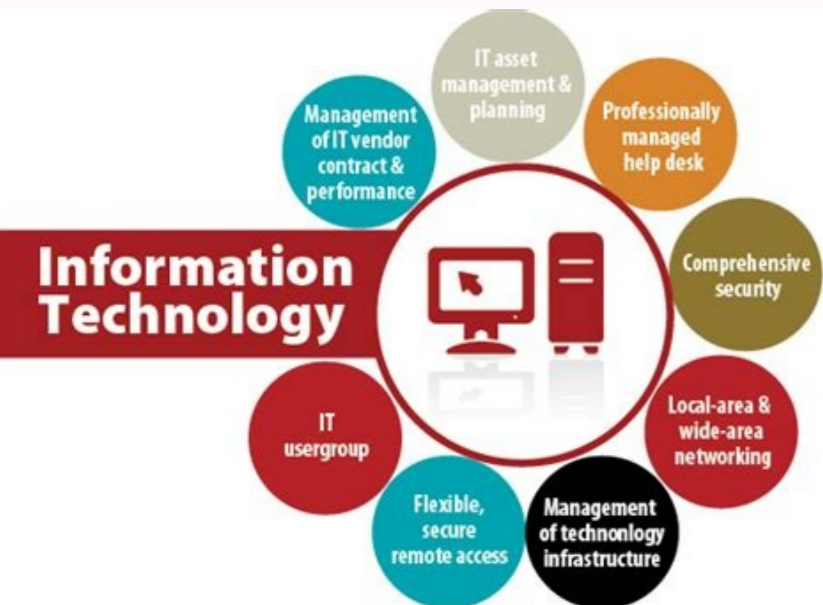

(7)

Computers are mostly used in every organization. Computer plays different roles in different fields now a day's no field is evolving without the role of computers.

Computers become a reliable product in every hospital due to its effective and efficient performance. From open heart surgery to X-Ray's everything is made possible so easily only through computers.

Apart from administrative purposes computers are used in performing surgeries. Laparoscopic surgeries is said to be the most common surgery which can be done only through the help of computers. The medical experts insert the medical tools and other small equipments attached with cameras into the patient's body.
